Assumed Protection, dB	16.2	17.8	20.7	25.7	28.6	31.0	36.1	35.6	L: 23 dB

Sync™ Fitting Instructions

Fitting: Place the ear cups over the ears. Adjust the headband by sliding the headband up or down at the adjustment points. The ear cushions should seal firmly against the head.

Optimised Fit: For best results, remove all hair under the cushion. Noise reduction will be adversely affected by anything that impairs the seal of the earmuff cushions against the head, such as thick spectacle frames, balaclavas, etc.

WARNING: All hearing protection affords limited protection. The user is responsible for the proper selection, use, care and maintenance of this device. Improper selection (including under/over protection), use or maintenance may lead to serious hearing loss.

DOC2308

Most stereo earmuffs provide some level of hearing protection.

But often sacrifice sound quality for attenuation.

That's why we created Sync™, the latest innovation in passive hearing protection for active lifestyles.

It's a stereo earmuff that's in sync with proper levels of hearing protection, high-fidelity sound, and your ability to listen to portable audio devices safely at work – and at home.

x Sync's 31 Single Number Rating (SNR) provides ideal protection from most low and medium levels of hazardous noise.

x Proven Automatic Volume Limiter technology manages output volume from your portable audio devices at 82 dBA.

Protection

Safety managers love the new Sync stereo earmuffs as much as their workers do. For starters, Sync's acoustically optimised earcup design delivers excellent protection against hazardous noise.

Inside, Sync's speaker technology manages sound levels reaching the user's ear at 82 dBA.

That's well within the EU directive's recommended 85 dBA Action Level.

Sync helps keep you motivated and productive in the workplace. It brings more satisfaction to the job, anywhere from general manufacturing and light assembly work to agriculture – or even listening at home. Sync has no volume knob or power switch to fiddle with, and no batteries to replace, so users can just plug in and go!

Productivity

Personalised

x Sync's 3.5mm input cable can plug into most MP3 players and other personal audio devices – ideal for use at work and at home!

The system manages volume to safe levels. But users have everything else just the way they want it. They simply plug Sync into their MP3 players or other personal audio devices. They turn on and off power and adjust volume through their personal audio devices, too. When they hear the audio quality they'd expect only from good home-use headphones, it doesn't take long for them to really get in Sync!

For use at work or at home, Sync's DJ-inspired earcup design and sound quality are on par with other professional and high-end personal headphones on the market. Sync boasts the most stylish design of any industrial earmuffs you've seen – with hearing protection that beats any entertainment headphones on the market. (All at a price close to what you'd pay for other good industrial earmuffs!) The Sync system sounds so good and looks so cool, people are wearing them home!

Style

x Sleek diamond pattern headband is easy to clean.

x Reinforced fork slides with handholds for easy and comfortable fit.

x Sync's patented acoustic chamber enhances bass sounds that are typically sacrificed in a stereo earmuff, eliminating the need to "crank up" the volume.
